You seem cool in there

Oh? Well, I'll take th' truck 'n drop some off t' night.

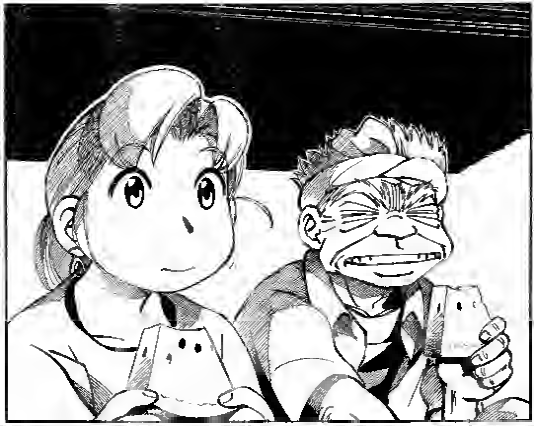
I'll have gasoline th' day after tomorrow or thereabouts.

5



Eh? No
It's summer vacation for Makki-chan.
So
Is Makki watchin' the shop?
Since no one comes in this mid-day heat
Ah.
It's rough for Makki-chan to come all the way to my place this time of day

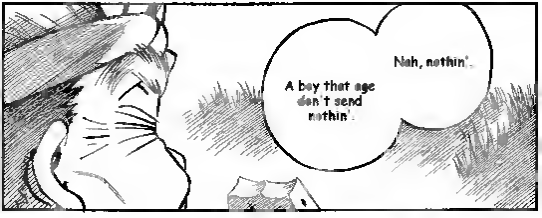
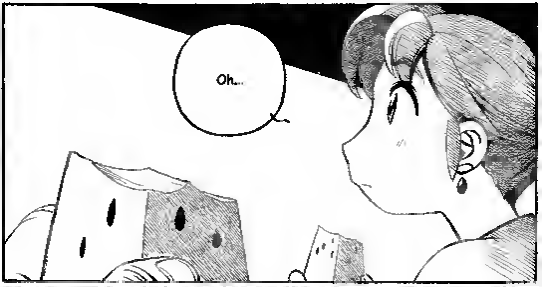
Have you...



A boy that age don't send nothin'.
Nah, nothin'.



Oh...

Yeah.

.....
Someday, Makki's gonna leave too...

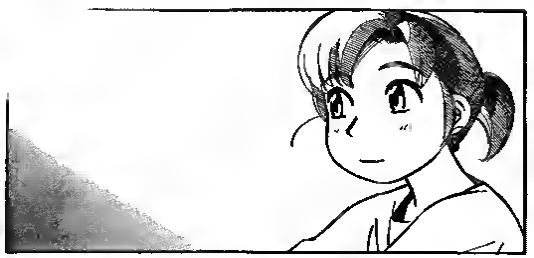
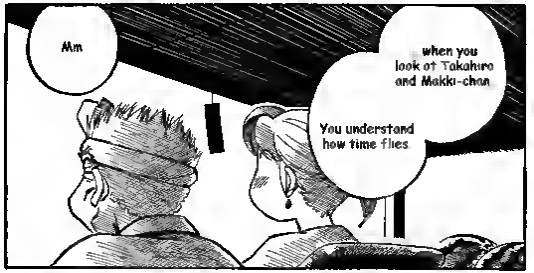
When that happens, there won't be nothin'but geezers fer 10 kiles in any direction.





Mm

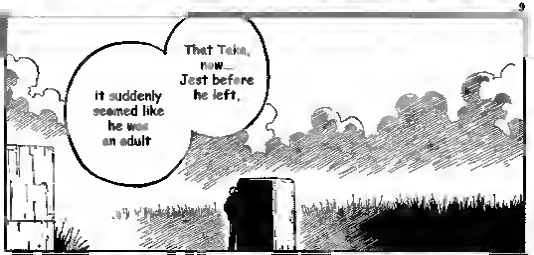
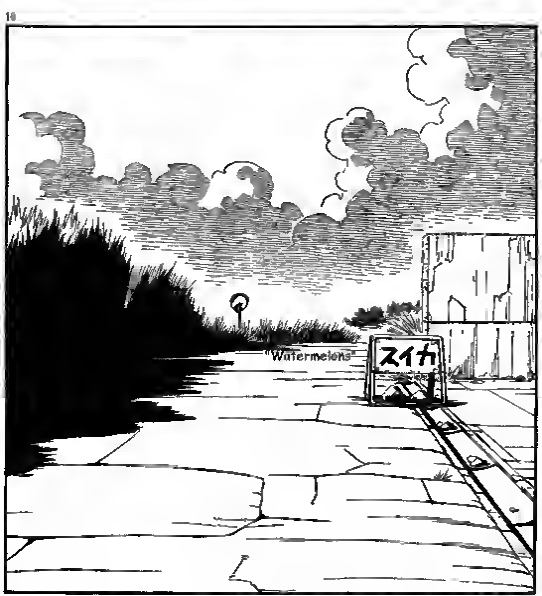
You understand how time flies



That Take, now... Just before he left,
it suddenly seemed like he was an adult

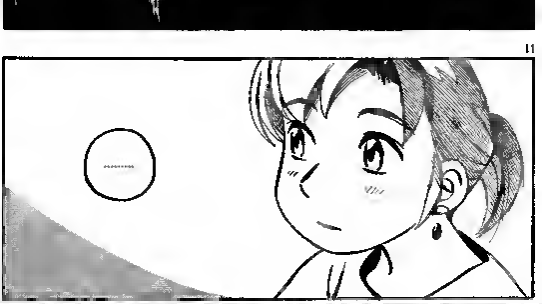
Yeah...



Watermelons
スイカ

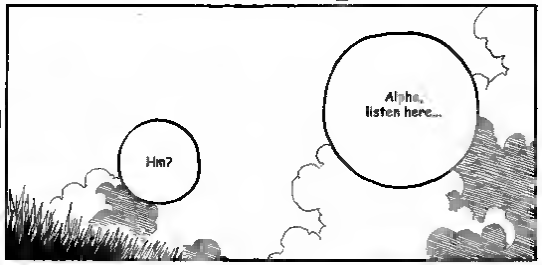
Hm?
Alpha, listen here...

It's gonna get even more quiet around here.
Sooner or later,

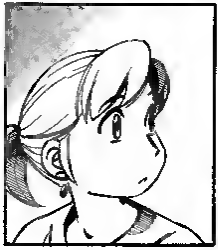


.....

I think ya noticed, but...
The waves are comin up on your place.
.....
Yeah



Alpha, listen here...
Hm?



Anyhow, you should move in an' open yer shop here.

It's high enough here. Ya can stay as long as ya like.

Every couple o' years, I come back here.

The house I was born in was in this valley.
Now there's no trace left. Buried by trees and grass.

All this racket has got to be bad for the ears.
Engulfed by countless cicadas with their weird, sweet smell.

The usual catch is bura.

Hey
!!

You're too dense
Wide open!
Weh.....

Seems like yu got plenty o' free time
Eh..
Not so much as before

Ah, the "come along with me" talk, right?
About what we were talking about before...
Hey, look...
Hm.
I see.
I'm not gonna go.
Yeah.
I see
There's something that'll come along that I'm gonna want to do
Nnn. It feels like

You'll be able to play with that one again.
I'll come by every now and then.
Thanks.

Goin' home.
What are you going to do, Ayase?
I'll head to my lodgin' after a bit.
When will you be back?
Mmm... Prolly come again next summer.

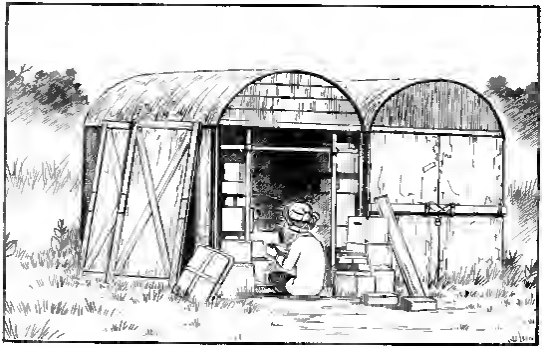
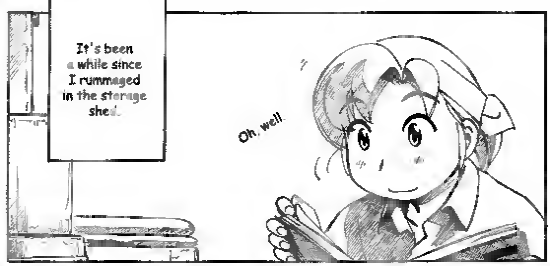
Chapter 124 "Heartbeat"
第124話「鼓動」

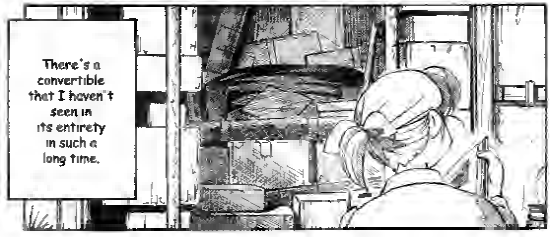
芦奈野ひとし



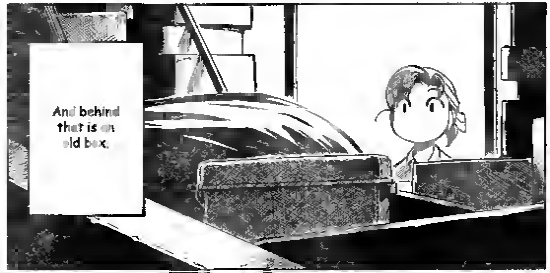
2



It's been a while since I rummaged in the storage shed.
Oh, well



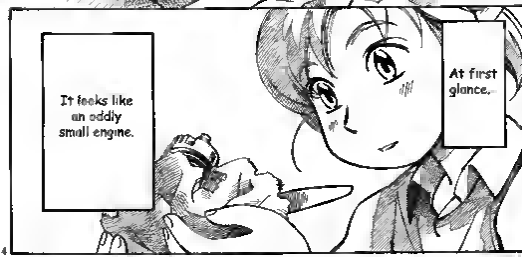
There's a convertible that I haven't seen in its entirety in such a long time.



And behind that is an old box.

Inside are rusty cans and netty old rags.
!

Inside the rags is a lump of metal.



It looks like an oddly small engine.
At first glance,

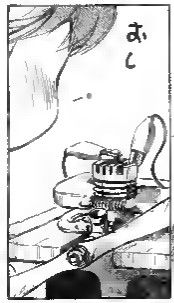
After reading the old-discolored manual, I finally understood that it was a model airplane engine

A hobby of Owner s that I had no clue about

5

I'm going to get you working!

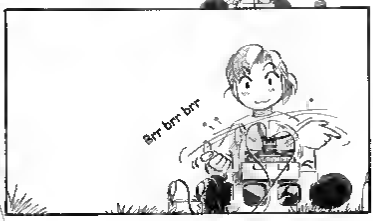
The plug still works...
If it's cleaned and fueled, it should work.
It's of a simple enough construction.
Out of the three cans two are almost empty, and the remnants seem kinda sludgy
Only one can seems to have contents that may be usable.
But I wonder what "Glow fuel" could be...
And these cans seem to be fuel.
Strange smell.
It's not petroleum.
Sniff sniff
There's no choice but to chance it.
Since I don't know what this fuel is right now.



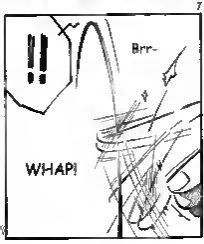
Next day

o Operation

If the engine floods, start over.

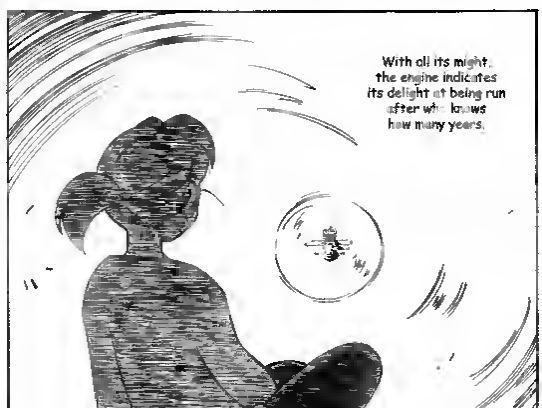


Beware the propeller



ひっく
!
Brrr
パラ..
イン
Hey hey!
It works!
BRRRRR
Remove the cord open the throttle, stabilize.
What a sound!

VRRRRRR
RRRR



With all its might,
the engine indicates
its delight at being run
after who knows
how many years.

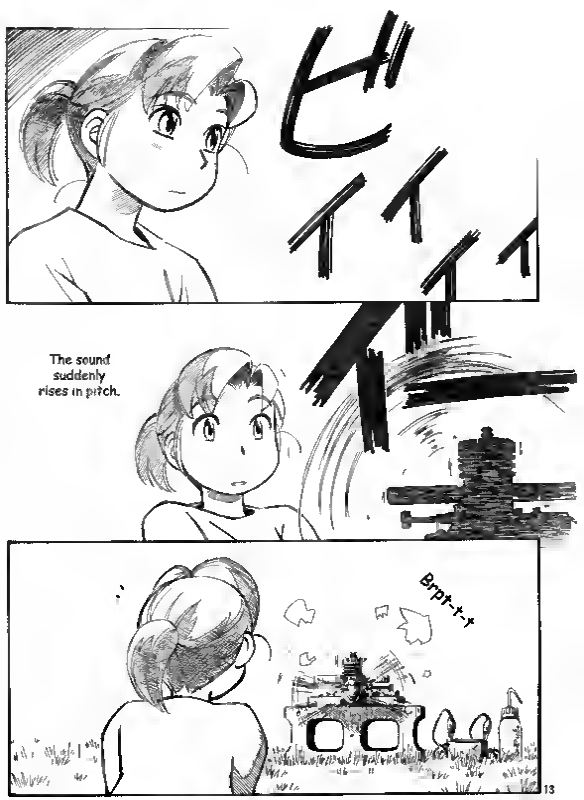
10

It runs like it's crying,
rushing, hurrying,
like it's saying,
"As if I'd even
leave a drop of what
might be the last
bit of fuel ever."

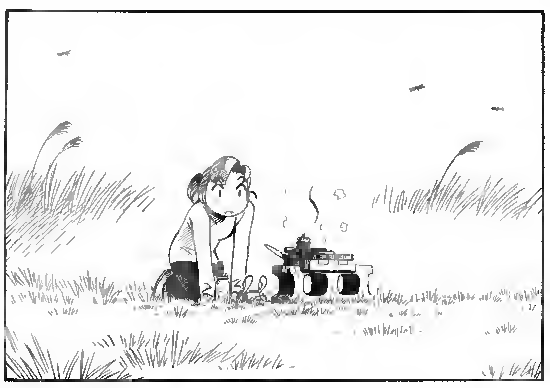
This happened
once before.

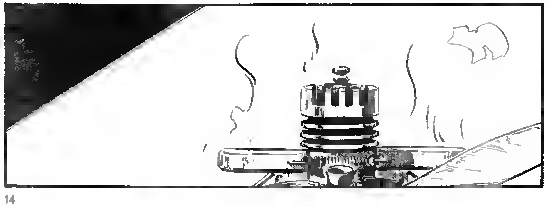
That day,
life welled up
throughout its body.

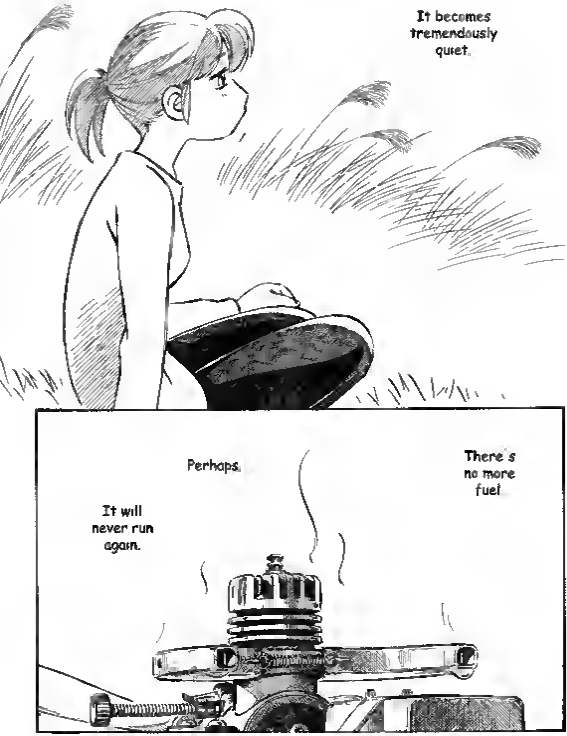
It was something that
sang out while burning
itself up, at the risk
that nothing would be left.



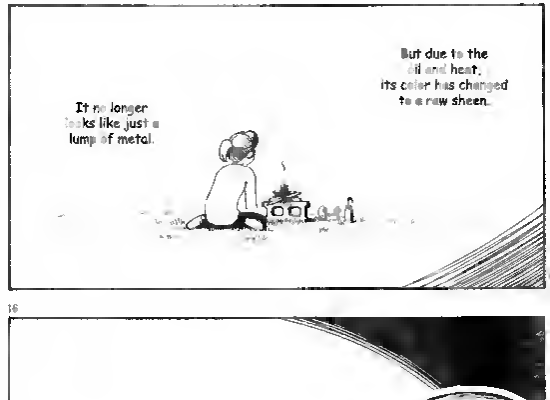
ピ
イイイ
The sound suddenly rises in pitch.
Brpt-t-t







It becomes tremendously quiet.
There's no more fuel.
Perhaps.
It will never run again.



But due to the
oil and heat,
its color has changed
to a new sheen.
It no longer
looks like just a
lump of metal.

It looks
like it has
nothing to say.

ブン

I've come to a vista point on one of my favorite mountain roads east beyond "Daisan Matarou".
putt putt

On the other side of the bay, Chiba seems big, like it's right there.
I stop the scooter's engine
The heat from the engine rises to warm my bottom

I can hear the muffler cooling down

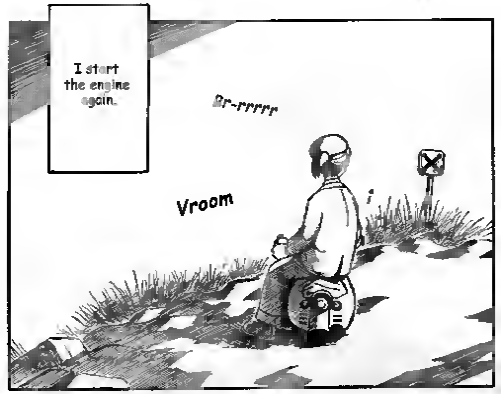
The oak trees are all bunched up and shining brown in the western sunlight
In the field, there is a white light truck and a blue galvanized shed
There's no one around



I start the engine again.

The tiny sound of the scooter's exhaust reverberates throughout the world

And then ease it back

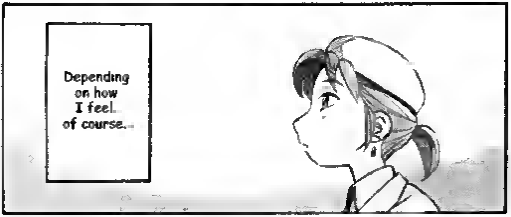
Being like this, I start to think that the scooter and I are similar things sitting on the road here.

When it gets like this...



Depending on how I feel, of course...

I can fly

Changing

However

Of course.

I think it's just a trick of my mind...
But today...

I'm a bit taken aback
By the unmistakable sight right before my eyes.

I've never really told anyone but...
I fly through the sky fairly often

I guess we should have had a carpenter come in after all.
Hey, about the cafe...

We didn't tear it down!
But tearing it down during the summer was the right thing to do.
I don't know.
If you do it yourself, you end up saying "I should have done this or that..."

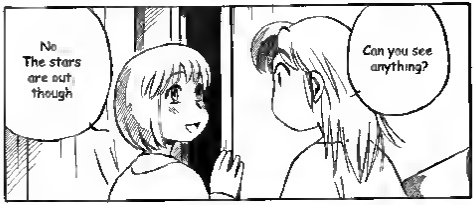
Ah
Sorry
Brrr!
Cold!

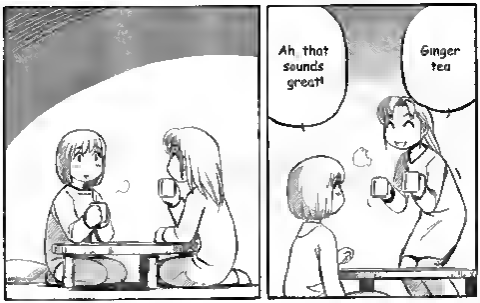


No
The stars are out though
Can you see anything?

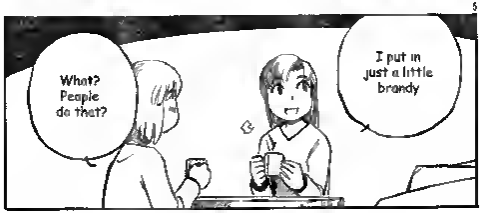
3

Watching from here isn't going to work, though
I guess you're right

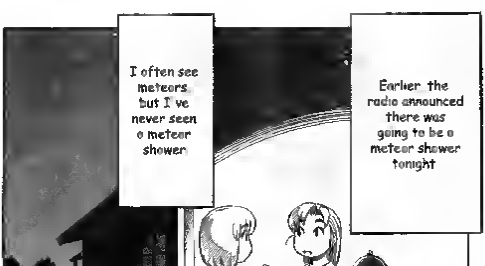
Ah...
Okay
I've brought out some warm stuff
so... let's go outside!
Huh?
Ah...
?
But before we do... let's warm ourselves up
4
Mm-mm. Almost there
Is there anything I can do to help?



Ginger tea
Ah, that sounds great!



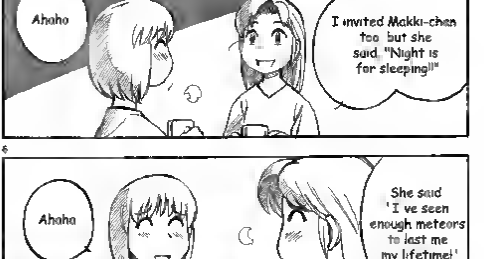
I put in just a little brandy
What? People do that?



I often see meteors but I've never seen a meteor shower
Earlier the radio announced there was going to be a meteor shower tonight

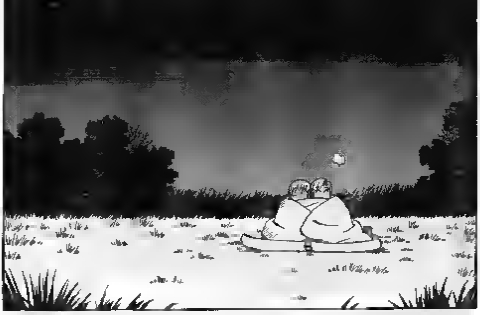
Ahaha
I invited Makki-chan too but she said, "Night is for sleeping!"

6



Ahaha
She said 'I've seen enough meteors to last me my lifetime!'

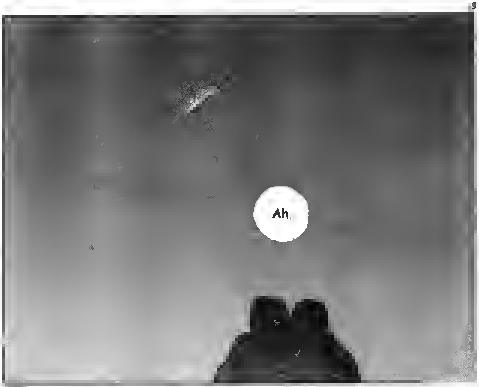
7



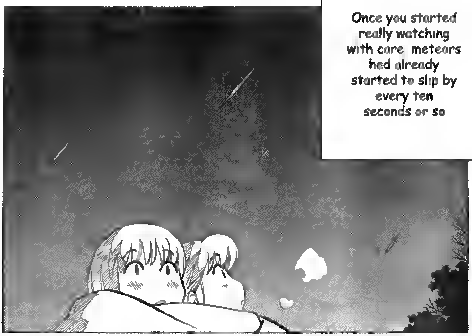
Ahhhh! This hot water bottle is wonderful
You said it

Huh?

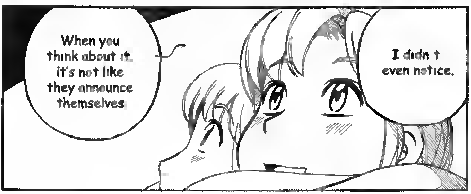
Eh?
Maybe it's started!?



Ah

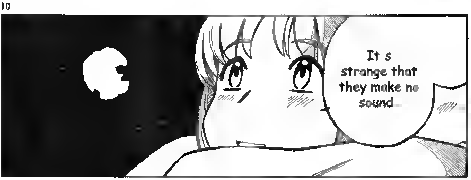


Once you started really watching with care, meteors had already started to slip by every ten seconds or so

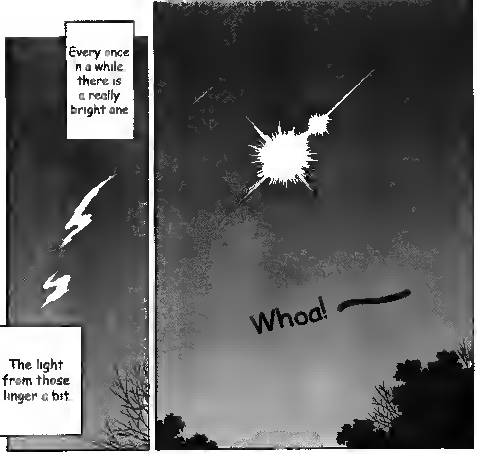


When you think about it, it's not like they announce themselves
I didn't even notice.

10

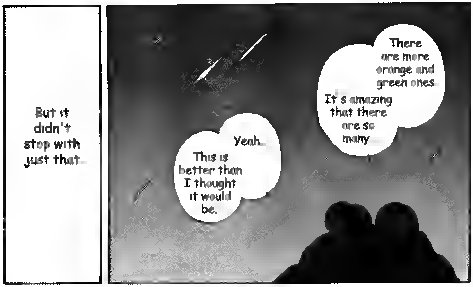


It's strange that they make no sound



Every once in a while there is a really bright one
The light from those linger a bit
Whoa!

11



But it didn't stop with just that.
This is better than I thought it would be.
Yeah...
There are more orange and green ones.
It's amazing that there are so many.

14

Yeah...
My body is floating up

The meteors continued to fall
into the lightening dawn sky

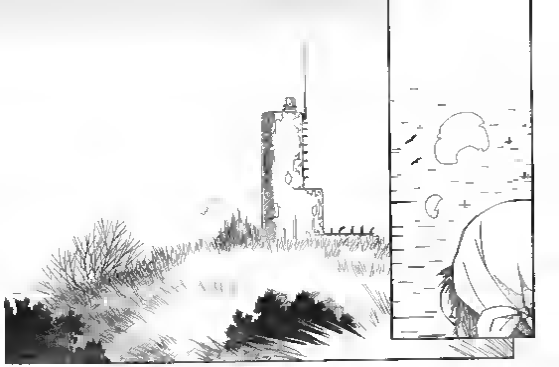
The cliff behind the house has fallen away sharply
Oh!
The waves washed away the red earth, and now the bedrock juts out
So that's why... the sound of the waves changed
Hmm.



ふー

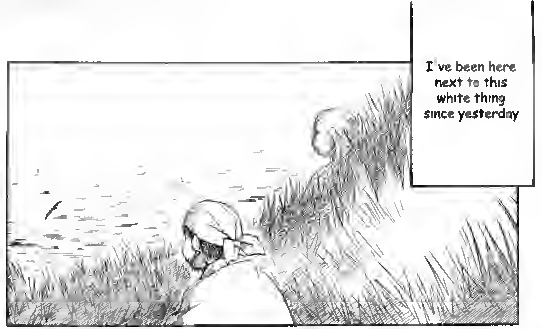
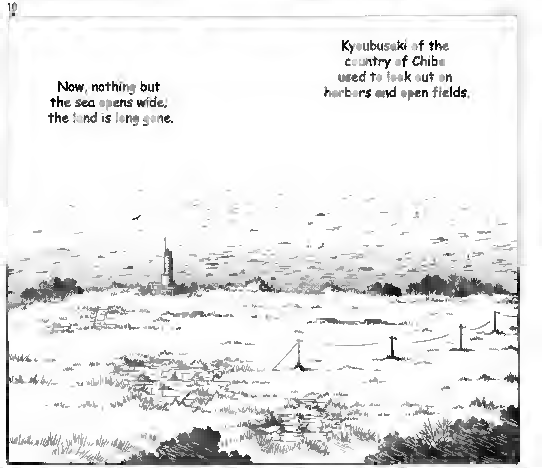
Ah.
Hello
Yer still here?
What thuh ?

Ya got nerve, son.
I'm amazed yuh managed ta spend th' night.
I thought I might head back sometime after noon.
Ah see.
I'm into this sorta thing.
clap

Thanks
Well then



I've been here next to this white thing since yesterday

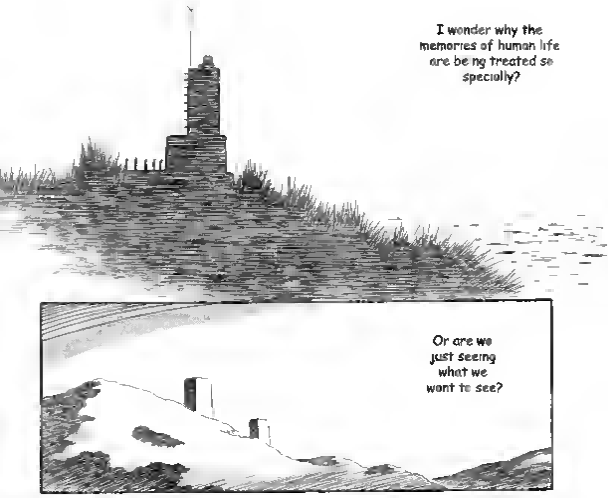


Kyoubusuki of the country of Chiba used to look out on harbors and open fields.
Now, nothing but the sea opens wide, the land is long gone.

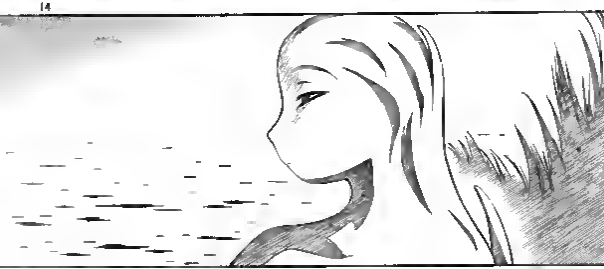
The white thing doesn't move at all
It sits in a spot that overlooks what is almost entirely a waterscape if that's the right word for it
It stares out into the distance its watery eyes barely open
Its surface is peculiar, and makes you feel hesitant to carelessly touch it

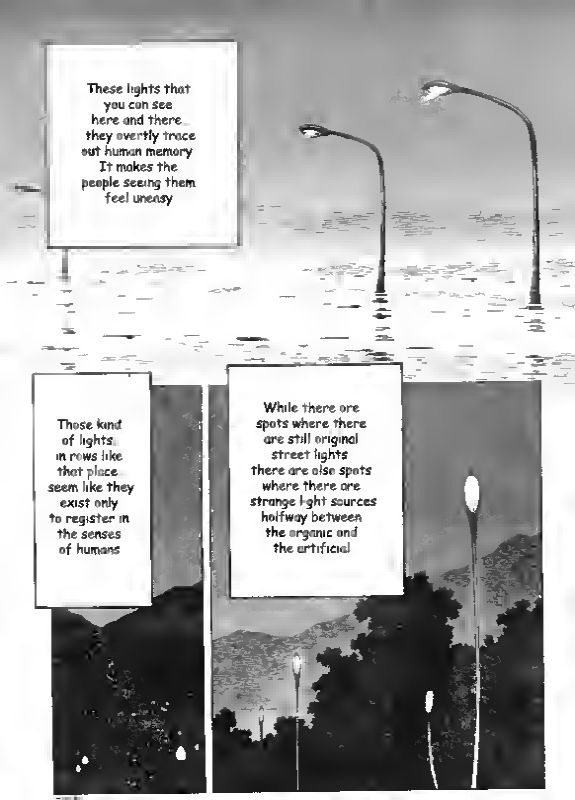
Last night -
I was able
to see the
'Kuyuku Satohama'
beach of old

That odd
line of
street
lights.



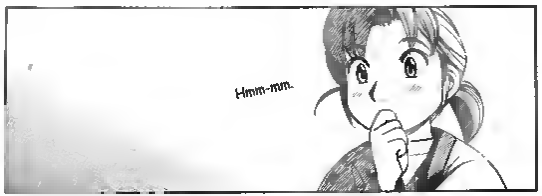
I wonder why the memories of human life are being treated so specially?
Or are we just seeing what we want to see?





These lights that you can see here and there... they overtly trace out human memory
It makes the people seeing them feel uneasy
Those kind of lights... in rows like that place... seem like they exist only to register in the senses of humans
While there are spots where there are still original street lights there are also spots where there are strange light sources halfway between the organic and the artificial

I wonder how far he's gone.
Hatsusen -sensei...



Hmm-mm.

Well, I guess it's made getting down to the sea easier.

Right That's fine.

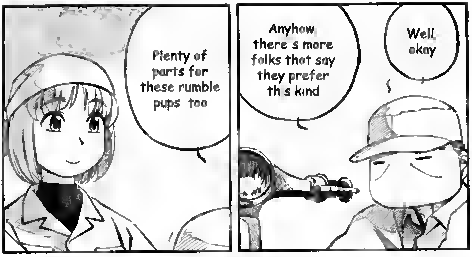
Your old meter had two strands 'n muscle... so it was smooth



Plenty of parts for these rumble pups too
Anyhow, there's more folks that say they prefer this kind
Well, okay

3

Well

Ah

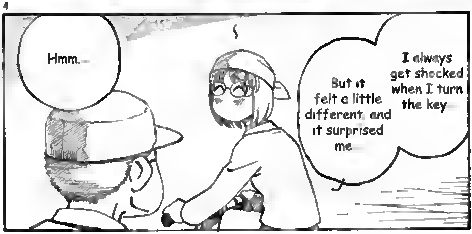
4



Hmm...
But it felt a little different and it surprised me
I always get shocked when I turn the key

You have some areas that are similar to muscle meters right?

Ah

Okay

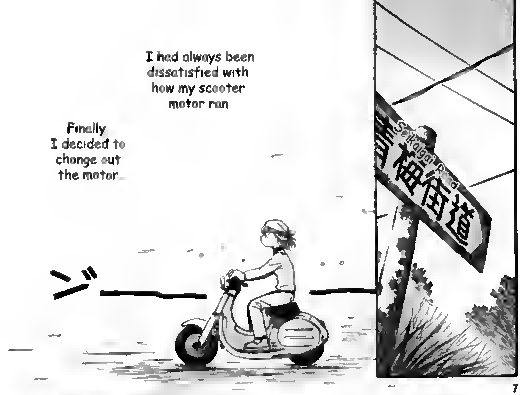
I see what you mean!
Yup
Mmmm

I had always been dissatisfied with how my scooter motor ran

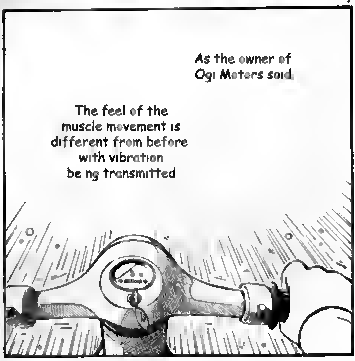
Finally I decided to change out the motor



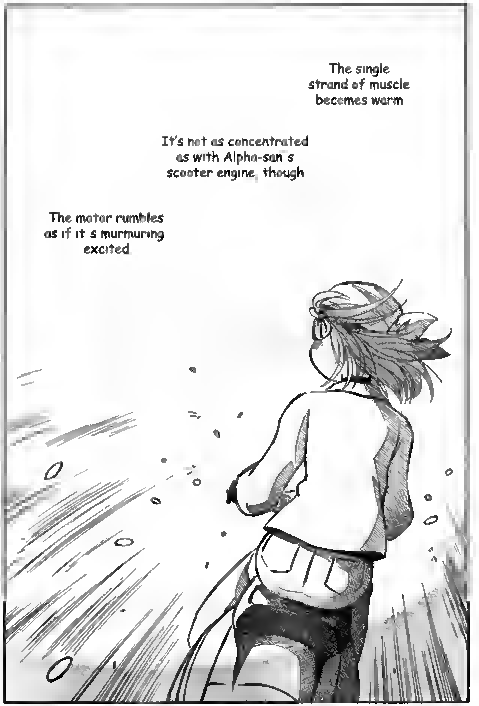
7

As the owner of Ogi Motors said

The feel of the muscle movement is different from before with vibration be ng transmitted

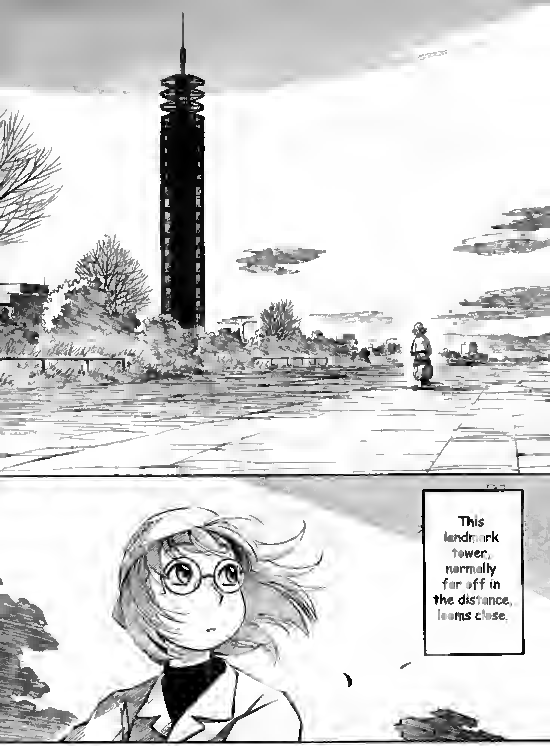


8



The single strand of muscle becomes warm
It's not as concentrated as with Alpha-san's scooter engine, though
The motor rumbles as if it's murmuring excited

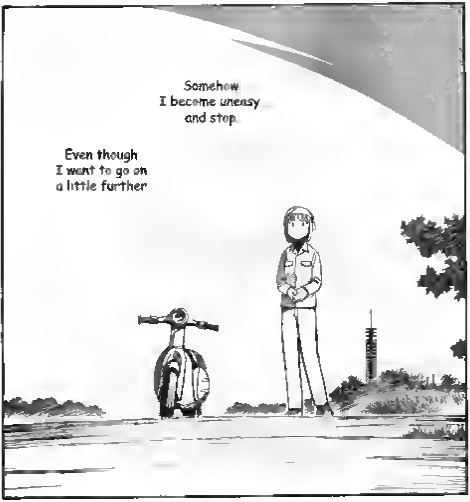
Ah, this feels
so good



This landmark tower, normally far off in the distance, looms close.

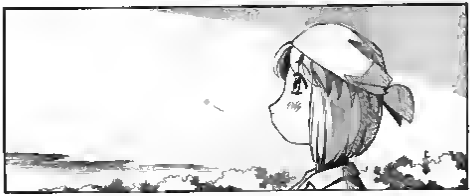
If you go on past...
the area around the road is
nothing but dense stands
of short trees

The road heads
straight west.



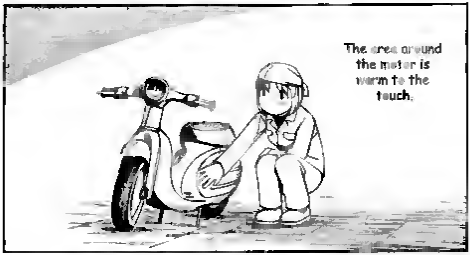
Somehow
I become uneasy
and stop.
Even though
I want to go on
a little further

13



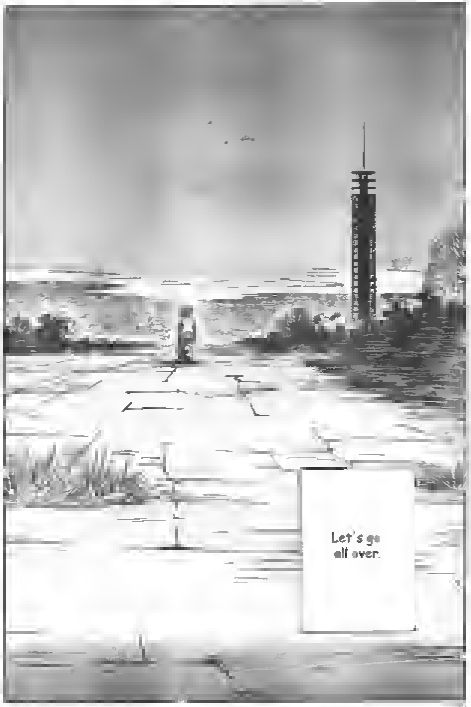
It would probably get pitch black...
If it were Alpha-san she would definitely go on and on...

14



The area around the motor is warm to the touch.

The road ahead will have to be next time.
let s go home



Let's go
all over.

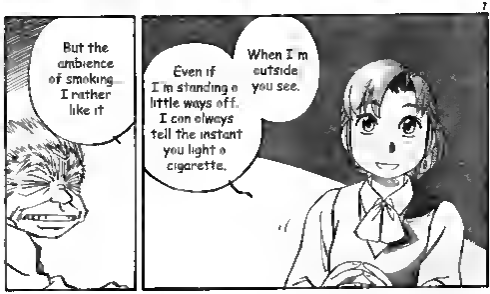
Ah! Ah! I didn't mean it like that!
Oh! Sorry!
Ah!?
Tobacco smoke has always bothered me
You know



But the ambience of smoking... I rather like it
Even if I'm standing a little ways off, I can always tell the instant you light a cigarette.
When I'm outside you see.

I see.
Mm yeah.
When I was a boy. I liked th smell o tobacco when my dad went out to smoke
On Sundays n such

——
I'm lightin up again.
And havin said that

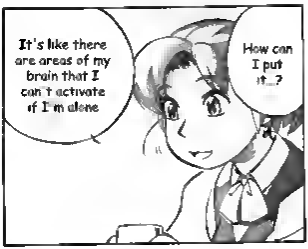
I once said to you that I liked being alone.
Oisan..
But now
I like the time when I'm not alone better



It's like there are areas of my brain that I can't activate if I'm alone
How can I put it...?

I see

Like there are areas that won't open...

10

Everyone's moving far away
Takahiro went away Mekki-chan will too... probably...

11

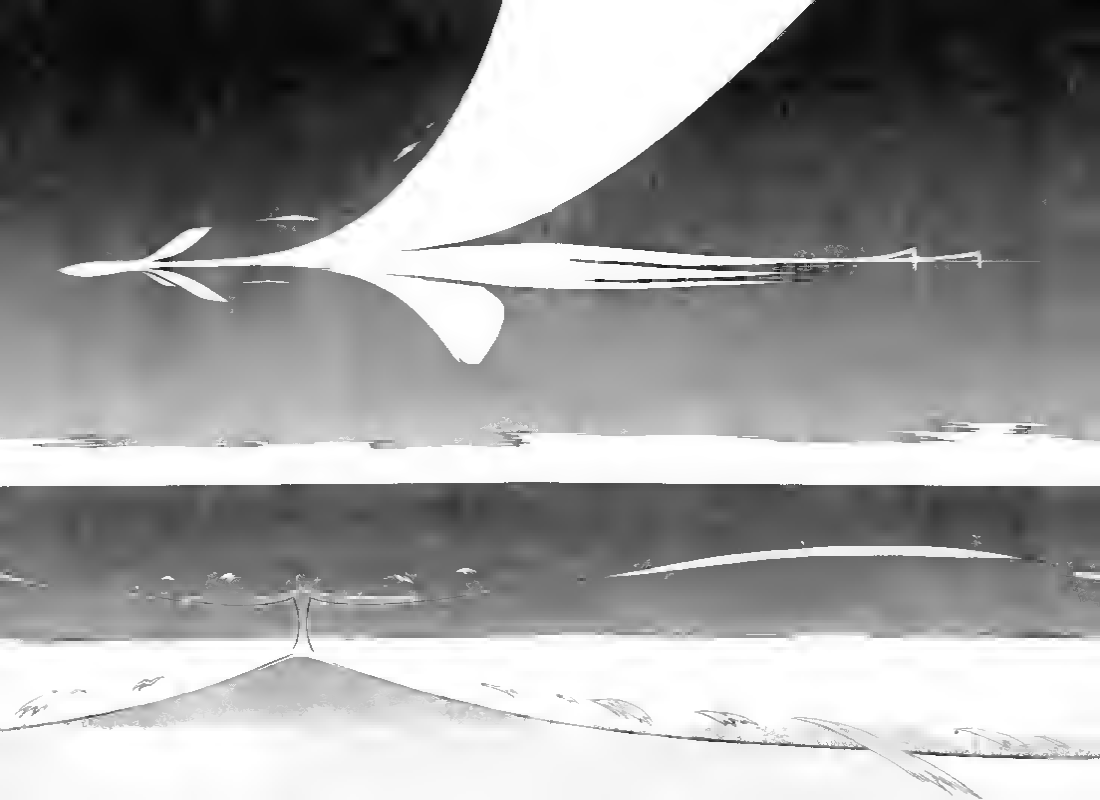
クキアツ猛暑に今日は完全休日。



I wonder how many times this makes the Northern Route
The surface of the Earth continues to grow quieter

Once the lights of people have vanished, after a while,
Blue lights can appear, as if they were tracing out cities and roads.
And the light of more cities have disappeared

The surface of the Earth at night... It already shines deep blue
I wonder what the people down below are dealing with.

Areas larger than great countries have quickly become silent

Even the country where I was raised...

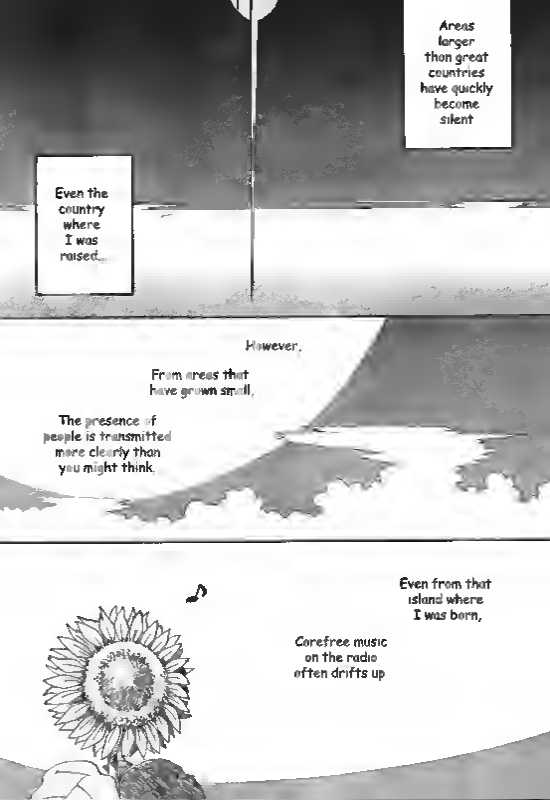
However,

From areas that have grown small,

The presence of people is transmitted more clearly than you might think.

Even from that island where I was born,

Carefree music on the radio often drifts up



The smell of rain.
The smell of morning.
The smell of bonfires.
The smell of asphalt.
The smell of fish.
The smell of exhaust...!

I wonder...
Would it be
all right for me
to go there?
If the
surface of

becomes
nothing but
blue light,
It's like
I want
it to
It's
